

Belly band template

One band: 11 x 1.56 in, for our 4 oz soap bars only

It wraps around the bar. We print your bands in house and band your soap at our shop.

Band edge

Page 1 is exactly one band, 11 x 1.56 in. There is no bleed: design to the page edge.

Fold lines

Where the band turns the corners of the bar: left side 15/16 in, front 2.8 in, right side 15/16 in, back 2.8 in.

Safe lines

Keep words and logos between these lines, 1/8 in in from the top and bottom edges.

Overlap

These ends tuck under and over the back of the bar. Use background color or pattern only, no words or logos.

How to use it

1. Design on page 1 in Illustrator, Photoshop, Affinity, InDesign, or Canva. Keep the page size as it is: 11 x 1.56 in.
2. Put your brand and product name on the front panel. Ingredients, weight, and your website usually go on the back.
3. Put your art in the "Your art here" layer. Hide the "Guides - hide before export" layer when you export.
4. Export each design on its own: a PDF (best), or a PNG or JPG at 300 dpi or more. Outline your fonts.
5. Keep text at 6 pt or larger. Name each file for what it is, like Honey 4 oz band.
6. Upload your files at wholesaletallowsoapusa.com/custom-labels (choose 4 oz soap belly band). We show a proof of each one before you order.
